B-Net 95 40 B-Client PDC3 – for Shop Floor Data Collection

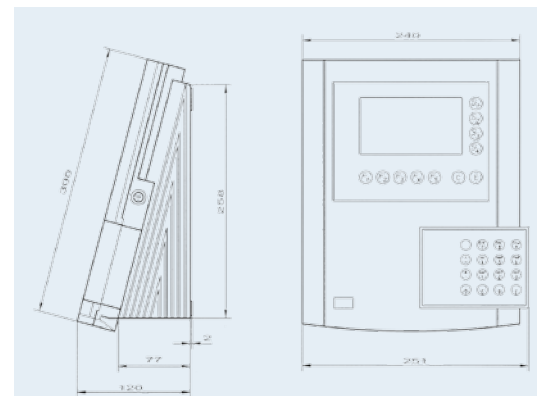

The B-Net 95 40 supplies all essential and factual data about states and processes within a company. It is the standard terminal for all Production Data Collection requirements. It can be adapted to data collection processes or be parameterized for individual tasks. The B-Net 95 40 satisfies the most demanding customer requirements.

B-Net 95 40 – The Features

- Graphic, transflexive LCD display with a resolution of 240 x 128 pixels for the display of time data and information.
- 15 configurable data collection processes with up to 18 collection steps. Selections can be made with 5 function keys and 3 soft keys.
- Similar or matching data collection processes are grouped with the help of three tabs.
- Convenient list selection, e.g. for malfunction reasons or cost center changes.
- Entry of individual data via an integrated alphanumeric reader keypad.
- Up to four languages are supported.
- Easy adaptation to collection processes through parameter setting.
- Storage of 2,000 master records and 8,000 booking records or 3,500 master records and 3,000 booking records respectively.
- Contact-free data collection via LEGIC reader. Further readers are available, such as inductive, mag-stripe, Mifare, Hitag, HID, etc.
- Data retention in case of power failure and automated restart.
- Operation in online, offline, and autonomous modes.
- Standard 10/100 Mbps Ethernet interface.
- Two relays and four digital inputs, e.g. for machine condition monitoring.
- IP 30 / IP 54 protection class (depending on type of reader).
- Three-point locking mechanism for even better housing sealing.
- Ambient temperature -10°C to +40°C.
- Investment protection because widely compatible with the Bedas / Bedanet terminals.
- Manufactured according to DIN EN ISO 9001 : 2000 quality standard.

Optional:

- Memory expansion for up to 10,000 master records and 50,000 booking records.
- Uninterruptible power supply (UPS) - for up to 4 hours operating time under typical conditions.
- Barcode vouchers are recorded via a second reader fast and securely.
