

# The Bedanet 92 20 for Access Control

**The Bedanet 92 20 is a terminal for all Access Control tasks.**

**With the storage of master records and access profiles, the terminal can make direct decisions to grant or deny access.**

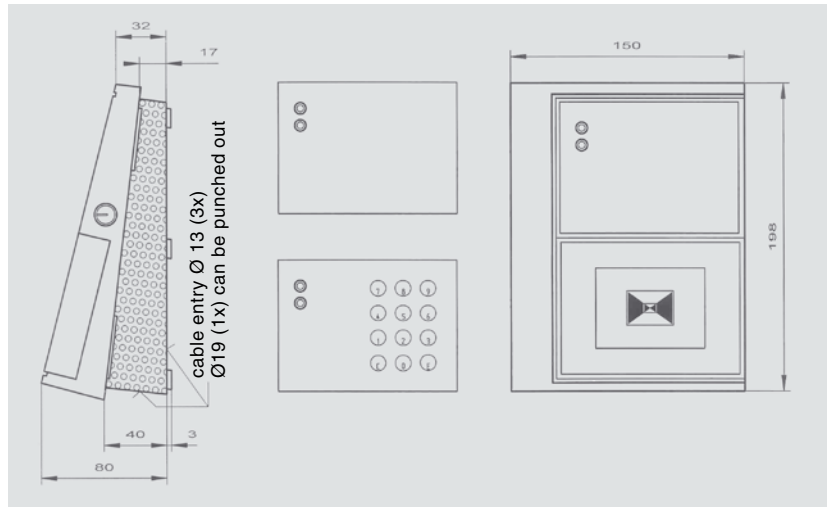

**For easy integration into IT structures, the terminal may be equipped with an Ethernet connection. For user identification, a hands-free LEGIC reading system is included as a standard feature. Other types of readers are available on request.**

**The Bedanet 92 20 is an access solution at a reasonable price (e.g., for the control of a door).**

TOTAL ACCESS

# Bedanet 92 20 Features

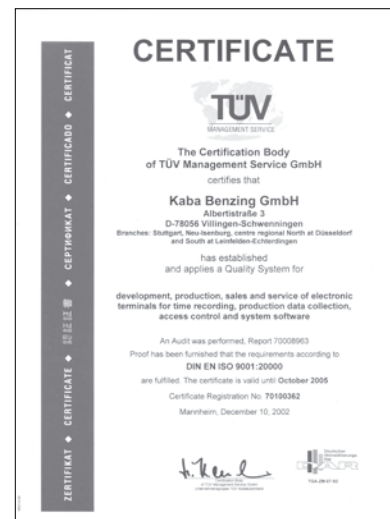

- Standalone terminal with a state-of-the-art wedge design to control a single door.
- Built-in door opener relay (30V AC/DC 2A) as well as 4 digital entries for door control (for instance frame contact, sabotage control).
- Storage of personal master records and time profiles in the terminal.
- With every access booking, the terminal checks the badge number against deposited master records and access profiles.
- Depending on the customer's requirement, different types of readers are available, for instance LEGIC, inductive, mag-stripe or barcode.
- 24 V AC/DC power supply.
- RS 485 interface.
- Environmental temperature: -25° C up to 55° C.
- Humidity 95% max. without condensation.
- For indoor and outdoor installation.

- Manufactured according to DIN EN ISO 9001 : 2000 quality standard.

## Options:

- Ethernet interface.
- Numeric keyboard for PIN code entry.
- Outdoor installation:
  - Weather protection bracket for use with contactless reading systems such as LEGIC.
  - Weather protection equipment (recommended for insertion or swipe readers, e.g. inductive, barcode, and mag-stripe readers).
- Column for mounting.
